MODEL DESCRIPTION

Serial No. 902000990xxxx (Model No. XXXX)

Card Type	Description
0	Blank
1	Combo Module (8 DI, 6 DO, 4 AI)
3	Combo Module (8 DI, 6 DO, 4 AI, 2AO)
4	Combo Module (16 DI, 14 DO)
6	32 DI Module

*See Table 1 for card types

HUSKY™

RTU 6049-E70 Mini

HUSKY RTU 6049-E70 Mini from Synergy Systems and Solutions is a compact Remote Terminal Unit (RTU) to cater to the needs of remote data collection / automated monitoring/controlling systems, which typically have very low I/O counts. Built using the proven technology of RTU 6049-E70, the Mini-RTU offers a customized and cost-efficient solution for remote data collection applications. The Mini-RTU features an embedded 32-bit microprocessor and a real-time operating system that provide the computing power to effectively meet the requirements of data collection and aggregation from a

32 Bit Fan-less Microprocessor

Up to 4 nos. RS232/RS485 Ports

Up to 2 nos. 10/100 Ethernet Ports

Built-in 3G/4G Modem

Modular Isolated Digital, Analog I/O

Industry Standard Protocols

multiple devices, and to communicate the data to single or multiple central stations. When performing data collection, the RTU can be configured to operate in either "Store and Forward" or "Router" mode as per the site requirements.

The Mini-RTU is an ideal choice for the applications that require interfacing with intelligent devices and with a limited number of hardwired I/O. The built-in wireless RF modem provides the RTU with RF communication capabilities. This allows use of public wireless infrastructure like GSM/GPRS/3G/4G to connect the RTU with central SCADA stations.

The compact arrangement of the Mini-RTU allows it to be deployed in wall-mounted enclosures also. The Mini-RTU supports both DIN rail as well as flush mounting.

Application Areas

- Feeder RTU
- Water Utilities
- Wireless I/O
- Automated Meter Reading
- Local Automation Unit
- Data Concentrator

The RTU supports a rich set of communication interfaces to cater varied demands of industry. It is equipped with up to 4 nos. of RS232/RS485 ports, 2 nos. 10/100 Mbps Ethernet ports and a built in 3G/4G modem. The availability of protocols like IEC60870-5-101/103/104, DNP3, MODBUS, IEC 61850 allows for integration with multi-vendor devices.

The RF modem enables the RTU to be used in M2M (Machine-2-Machine) applications. When used in conjunction with our M2M gateway, a full-featured remote telemetry/data collection solution can be implemented, that is both secure and scalable.

SYNERGY
SYSTEMS & SOLUTIONS

The RTU has built-in analog and digital I/O for interfacing with local hardwired signals. All the I/O channels are isolated and surge-protected, for use in electrically harsh environments. The digital inputs support 1ms Sequence of Events recording, and the digital outputs support Select-Before-Operate function. The analog input channels support DC voltage and current inputs. Analog output option is also available that supports both voltage and current outputs.

LED INDICATIONS

LED	Purpose
PWR	Power ON
FLT	Fault Entry Present
RUN	1 Hz : Safe Mode 5 Hz : Normal Mode
U0, U1	User Definable LEDs
RF	Radio Module LED
NOR/DEF	Normal / Default Mode
LAN	<ul style="list-style-type: none"> █ ON: Link █ BLINK: Activity █ ON: 100 Mbps █ OFF: 10 Mbps
COM	<ul style="list-style-type: none"> █ Tx █ Rx

NO/COMMON POINT

Pin	Signal Name
1	COM

3	EARTH

TECHNICAL SPECIFICATIONS

I/O Slots	4
I/O Connections	Pluggable spring clamp connector
Ethernet Interface	RJ 45
Serial Interface	RJ 45
RF Modem	3G / 4G Radio Modem (Optional)
SIM Interface	Micro-SIM (Dual SIM support available (Optional))
Input Power	18~36VDC / 36~72VDC*
Power Consumption	25W Max.
Operating Temp.	-10~70°C
Relative Humidity	95% Non-condensing
Dimensions	(L)210mmX(D)190mmX(H)185mm
Weight	3.0 Kg

TECHNICAL SPECIFICATION OF COMM PORTS

Serial	Up to 4 serial ports DMA Operated RS232 / RS485 software selectable Bit Rate <= 115200 Surge protected Isolation = 3 KV
Ethernet	Up to 2 ports 10/100 MBPS with Auto MDI-X Surge protected Isolation = 1KV

TECHNICAL SPECIFICATIONS

DI CHANNELS

Pulse Counter	1KHz maximum
BCD	Minimum 4 channels per BCD digit.
Isolation	3.7KV DC
Isolation between groups	500VDC
Protection	Surge & Overload
Input Filter	Settable from 1-255 msec in configuration
Chatter Filter	Yes

Nominal Input Voltage	24VDC / 48VDC*
On Input Range	15-30VDC / 38-50VDC
Off Input Range	0-12VDC / 0-24VDC
Input Current (per channel)	< 1mA / < 2mA
Status LED	Channel status. When lit Green, means ON

*Available on request

DO CHANNELS

Isolation	1KV between field and system
Protection	Surge
Contacts	Potential Free NO Contacts
Status LED	Channel status. ● Channel Selected. ● Channel Executed.

AI CHANNELS

Voltage Inputs	0-10VDC 0-5VDC ± 10VDC ± 5VDC
Current Inputs	0-20mA 4-20mA ±20mA Install the channel jumper to enable current mode.
Input Counts	Unipolar: 0 - 32767 Bipolar: -32768 - +32767
Resolution	16 bit (15 bit data + 1 sign bit) both for inputs
Accuracy	0.1%
Input Impedance	Voltage Inputs: 1 MOhm nominal Current Inputs: 250 Ohm nominal
Isolation	Field & System 1500VDC Between Channels 500VDC
Protection	Surge & Overload

AO CHANNELS

Resolution	16 bit (15 data bits + 1 sign bit)
Accuracy	0.1% or better
Voltage Outputs	0-10V DC 0-5V DC +/- 10V DC +/- 5V DC Uninstall the channel jumper to enable voltage mode.
Current Outputs	0-20mA 4-20mA Install the channel jumper to enable current mode.
Output Characteristics	Voltage Outputs: Min 1KΩ load Current Outputs: Loop compliance voltage 21V
Isolation	Field & System 1500VDC Between Channels 500VDC
Protection	Surge & Overload
Fault Alarms	Open Loop & Short Circuit
